

Intent:

At Altarnun Primary School, our curriculum is more than just a set of subjects; it's a reflection of our culture—one that ignites curiosity, celebrates excellence, and embraces effort. We go beyond mere academics to shape well-rounded individuals, carefully guiding our children's journey through the big ideas and core knowledge that bring subjects to life. Our meticulously sequenced curriculum ensures that learning is built progressively while honing essential skills in reading, writing, and oracy.

We hold a deep appreciation for the power of **reading**. We believe it opens doors to a universe of ideas, nurturing empathy and understanding along the way. Encouraging **kindness** lays the foundation for a compassionate community, where respect and empathy flourish. We challenge our children to **dream big**, sparking their imagination and empowering them to envision their potential and strive for their aspirations. Teaching responsibility instils accountability, guiding our children to take ownership of their actions and make positive contributions to society; becoming the **best** versions of themselves! Together, these pillars form a holistic learning environment that prepares our pupils not only for academic success but also for a fulfilling life grounded in curiosity, compassion, ambition, and integrity.

Implementation:

Implementing our curriculum involves a series of strategic steps:

1. Carefully sequencing content to systematically build knowledge and skills.
2. Providing continuous training and support for school staff to effectively implement our curriculum.
3. Identifying assessment practices that offer meaningful feedback for children, parents, and staff.
4. Creating a warm and engaging classroom environment.
5. Celebrating achievements and successes, both personal and academic.
6. Engaging in reflective practices to continually enhance and refine our approach.

Impact:

We measure the impact of our curriculum through:

1. Evaluating children's progress and attainment.
2. Ensuring all children become proficient readers.
3. Monitoring engagement in curriculum enrichment activities.
4. Assessing children's attitudes towards learning and their attendance.
5. Valuing shared learning experiences, including lesson observations, reviewing children's work, seeking pupil feedback, and engaging with the wider community.

Our ultimate goal is to cultivate a vibrant and inclusive learning environment where children are motivated, supported, and inspired to unlock their full potential.

Altarnun Primary - Learning Together, Achieving Forever!
